

Which LobbyGuard is Right For You?

LobbyGuard is available as a self-service LobbyGuard Kiosk or as LobbyGuard Assist, an operated-assisted software application that installs on your existing PC. Determine which is right for your facility:

You want to track visitors, but have no lobby personnel.

LobbyGuard Kiosk is perfect for facilities that have no front desk staff to meet or check-in visitors.

Your customer service philosophy encourages a more hands-on approach.

LobbyGuard Assist provides a hands-on visitor-sign in procedure for facilities that want to greet each customer individually or visually check their identification.

You have lobby personnel, but not at all times.

LobbyGuard Kiosk works around the clock, even when your lobby staff is away.

You prefer the kiosk model, but have a limited budget.

LobbyGuard Kiosk is a perfect entry into the LobbyGuard line of products. Kiosk and Assist work seamlessly together allowing you to network multiple units together or scale your system down the road.

COMPONENTS AND FEATURES	Assist	Kiosk
